IOWA STATE UNIVERSITY
Dear Iowa State University Graduates and Guests:

Welcome to Iowa State University’s Spring 2009 Commencement!

We congratulate all of the graduates and thank everyone who played a role in their successful journey through Iowa State. We have very much enjoyed your being a part of our university and community, and we wish you well as you embark on this next part of your life. We look forward to continuing our association with you as alumni of Iowa State, and we hope you will come back to visit the university often.

Iowa State University is now in its 151st year as one of the nation’s leading land-grant universities. We are very proud of the role this university has played in preparing the future leaders of our state, nation and world, and in meeting the needs of our society through excellence in education, research and outreach. As you graduate today, you are now a part of this great tradition and we look forward to the many contributions you will make.

I hope you enjoy today’s commencement ceremony, and that you will continue to be connected with Iowa State University.

Sincerely,

[Signature]

Gregory L. Geoffroy
President of the University

The Bells of Iowa State ................................................................................................................... Back of Program
The Iowa State University mace symbolizes the authority of the university president. The lead faculty marshal carries it at the head of the academic procession and, by placing it on its stand, signals the beginning of the commencement ceremony.

In medieval times, the mace was a studded, clublike weapon, made of iron. It was capable of breaking armor, and was associated with the protection of kings in France and England.

In the 13th century, it was used for civil purposes and processions. Eventually it became a symbol for academic institutions, an emblem of order and authority in the pageantry.

Created in bronze, silver and tiger maple, the Iowa State University mace incorporates important campus icons such as the campanile located on central campus and the Fountain of Four Seasons, located on the north side of the Memorial Union and features likenesses of four Native American women. The sculptures were created in 1941 by Christian Petersen, sculptor-in-residence from 1934-1955.

The mace’s bronze headpiece is an interpretation of the campanile. It includes a silver presidential seal and reflects in a disc representative of the Fountain of the Four Seasons. The words “Iowa State University – Science With Practice” are inscribed on the edge of the disc. Under the disc is a shortened version or reflection of the campanile headpiece.

The tiger maple staff bears 14 bronze plaques inscribed with the names of all previous Iowa State presidents, their years of service, and a laurel leaf symbolizing the attainment of graduation.

At the staff’s base is an unfolding bronze leaf symbolizing the beginning of a new era for graduating students. The overall height of the University mace is 60 inches, and it weighs 14 pounds.

Sculptor Jeanne L. Stevens-Sollman of Bellefonte, Pennsylvania designed and crafted the Iowa State University mace.

Private funds from the ISU Alumni Association’s Circle of Former Presidents, Chairs, and Executive Directors, the Stanton Carillon Foundation, and the University Museums made the design and purchase of the Iowa State University mace possible.

The presidential chain of office symbolizes the rich history and traditions of Iowa State University and is worn by the president at all commencement ceremonies.

It was first worn by President Gregory Geoffroy during the Spring 2008 commencement ceremonies to mark the end of Iowa State University’s year-long sesquicentennial celebration.

Created by sculptor Jeanne Stevens-Sollman—the same artist who created Iowa State’s mace—the presidential chain of office complements the mace. The two pieces were commissioned by University Museums and the ISU Alumni Association and are part of University Museums’ Art on Campus collection.

The front of the presidential chain of office features an image of the campanile, and Beardshear Hall’s east portico (the campus home of the president) is on the back. The shoulder epaulets are the columns of Beardshear and contain the words Leadership and Service. The campanile links in the presidential chain of office contain the words Engagement, Learning, Discovery and Access. The reverse sides of the bronze sections have low bas reliefs of corn. Most pieces in the necklace are bronze. The seal in the center of the campanile and the links in the necklace are sterling silver.

Both the presidential chain of office and the mace are housed in the alumni center and are used at each commencement ceremony.
Academic Regalia

In May 2008, as part of its sesquicentennial celebration, Iowa State University debuted custom-designed doctorate regalia.

The special commencement doctorate gowns were created with emblems and colors to reflect Iowa State’s tradition and to complement Iowa State’s hood. The fabric is cardinal red gabardine with black velvet panels and chevrons edged with gold cording. The Campanile, a beloved symbol and University tradition, adorns each of the two front velvet panels. An eight-sided black velvet tam with a gold silk tassel completes the official regalia.

The ceremony as well as the academic costume at commencement symbolize the record of academic achievement of the various individuals taking part in commencement exercises. The use of academic costume reaches back to medieval times and the beginnings of the famed old universities of Europe and England. Gowns (long, full robes) and cloaks with hoods were common garb. The unheated buildings frequented by medieval scholars certainly were an important factor in the choice of clothing.

A confusing array of caps, gowns, and hoods emerged from the centuries in Great Britain and from early years of higher education in the United States. American institutions recognized the need for a standard code and the great majority of academic costumes now worn in the United States are in accordance with the general provisions of the Intercollegiate Code of 1895. This code was slightly revised in 1932 and again in 1959. Under this code, the bachelor’s gown has pointed sleeves; the master’s gown has oblong sleeves with an arc at the bottom; and the doctor’s gown has bell-shaped sleeves.

The Code dictates that bachelor’s and master’s gowns are untrimmed. However, the doctor’s gown is faced down the front with velvet and has three bars of velvet across the sleeves. The facing and bars may be black or may be a color pertaining to the discipline. The color of the commencement gown varies in other countries. In America, black is typically the color of choice for bachelor’s and master’s degrees.

The square shape of the scholar’s cap or mortarboard is thought to denote the stability of scholars and their books as suggested in the old poem, “The Ballad of the Cap,” first published in 1564. Candidates for advanced degrees wear black tassels. The following is a list of tassel colors for baccalaureate degree candidates:

Agriculture and Life Sciences – Maize
Business – Drab
Design – Brown
Engineering – Orange
Human Sciences – Maroon
Liberal Arts and Sciences
   Bachelor of Arts – White
   Bachelor of Liberal Studies – White
   Bachelor of Music – Pink
   Bachelor of Science – Golden Yellow
Veterinary Medicine – Gray

The hood gives color to the academic costume while its length indicates the wearer’s academic degree. At Iowa State, hoods are worn by doctorate degree recipients. Exceptions are made for honorary degree recipients and other officials of the ceremony. In general, hoods are made of a wide panel of black cloth, matching the gown and are lined with satin in the official academic colors of the institution awarding the degree.

Iowa State University’s colors are cardinal and gold, therefore the top half of the lining is gold and the lower part is cardinal. The colors used in the edging of hoods and tassels are associated with the discipline. For example, dark blue represents Philosophy and all hoods used in conferring the Doctor of Philosophy degree at Iowa State University are of dark blue edging.
HOODING CEREMONY, DOCTOR OF PHILOSOPHY

The Doctor of Philosophy is the university’s highest academic degree, awarded only to those who have successfully completed an intensive and demanding course of study whose primary focus is on learning to conduct original research.

The final stage of the program is the preparation and defense of a dissertation that describes the outcome of a major research project. To prepare for that project, the student must have gained expertise and skills in a particular discipline and must have thoroughly explored its existing knowledge base.

Those who receive doctorates have demonstrated that they are truly experts in their fields whose research has already contributed significantly to human knowledge.

The hooding ceremony symbolizes their admission to the exclusive ranks of those who have earned the respect associated with the title “Doctor of Philosophy.”

During the hooding ceremony, the degree recipients are escorted and hooded by their major professors who have worked with them throughout their study for the doctoral degree. The hoods will connect the graduate with a family of scholars throughout history and from all parts of the world.

SPECIAL RECOGNITION, ADVANCED DEGREES

Candidates for graduation for the Master’s or Ph.D. may be recognized with the Teaching Excellence Award or the Research Excellence Award.

The Teaching Excellence Award recognizes those who provided outstanding contributions in teaching undergraduate students while working toward a graduate degree.

The Research Excellence Award recognizes those who with outstanding research accomplishments in a graduate program.

Honorees for both awards wear cardinal and gold honor cords and are noted in this program as follows:

§   Research Excellence Award
††  Teaching Excellence Award

SPECIAL RECOGNITION, UNDERGRADUATE DEGREES

Candidates for undergraduate degrees may be recognized for graduating “With Distinction” or for graduating in the Honors Program. Levels of special academic achievement are indicated in the commencement program by Latin phrases, also known as Latin honors. This system is recognized internationally, however the requirements vary among institutions. In the United States, Latin honors are most often awarded to those earning undergraduate degrees and each academic institution sets its own standards and requirements for each honor.

At Iowa State University, candidates for graduation with distinction must have completed 60 semester credits of coursework at ISU at the time they graduate, including a minimum of 50 graded credits. Those graduating summa cum laude (with highest distinction) have earned a grade-point average of 3.90 or higher; magna cum laude (with great distinction) have a grade-point average of 3.70 to 3.89; or cum laude (with distinction) have a grade-point average 3.50 to 3.69. Grade-point averages are based on a 4.0 scale. In addition to the notation in the commencement program, this recognition appears on the official transcript and diploma.

The University Honors Program is an individually planned program of study designed to provide greater depth and breadth of scholarship than the regular curriculum. Those graduating from the University Honors Program have a grade point average of at least 3.35 and have designed and completed an individualized program of study, including an independent Honors Research Project.

Students graduating with special recognition will wear cords and be noted in this program as follows:

* * * Summa Cum Laude - with highest distinction (cardinal and gold cords)
* * Magna Cum Laude - with great distinction (gold cords)
*   Cum Laude - with distinction (cardinal cords)
†   Honors Program (white cords)
**Academic Titles**

The following provides a brief description for the academic titles that appear in this program followed by a list of symbols for each title. Where appropriate, a symbol will be displayed behind the person's name.

Distinguished Professor denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

University Professor denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University.

An endowed chair or professorship provides special recognition to the faculty member to whom the title is awarded. It is held for a specific term, and during that time, endowment earnings are used by the university to supplement departmental support of the faculty member’s scholarship and responsibilities in teaching, research, outreach, and service. These chairholders specialize in areas of study identified by the donors who created the endowments.

**Iowa State University Traditions**

*Information Provided by the Iowa State University Alumni Association*

- The first swans on Lake LaVerne, Lancelot and Elaine, were a gift from the 1935 VEISHEA Central Committee. From that day on, there has been a pair of swans on Lake LaVerne.

- When Iowa State's young football team beat mighty Northwestern University 36 to 0 in 1895, and article in the Chicago Tribune said, “Northwestern might as well have tried to play football with an Iowa cyclone as with the Iowa team it met yesterday.” Thus, the “Cyclones” were born. Cy the Cardinal became Iowa State's mascot in 1954.

- VEISHEA, an all-university spring open house first organized in 1922, is among the nation's largest university student-managed festivals. The festival got its name from the first letters of Iowa State's first colleges: Veterinary Medicine, Engineering, Industrial Science, Home Economics, and Agriculture. Two of VEISHEA's long-standing traditions are individual cherry pies and the musical production “Stars Over VEISHEA.”

- In 2003, Iowa State revived a 60-year-old tradition: the Official ISU Ring. Students and alumni worked with the ISU Alumni Association and University Book Store to design a ring that symbolically captures the uniqueness of Iowa State. Rings may only be worn by alumni or by students who have achieved junior or senior status. Rings are officially presented at an annual ring ceremony.

- It is said if you step on the bronze zodiac relief on the floor of the Memorial Union's Gold Star Hall, you will flunk your next test. Fortunately the bad luck can be averted by throwing a coin into the Fountain of Four Seasons.

- The tradition of “campaniling” states that a student officially becomes an Iowa Stater when he or she is kissed under the university’s campanile at the stroke of midnight.
Simon Estes, internationally-acclaimed bass baritone, is the star of the stage at the world’s major opera houses, a regular guest at international festivals, and has appeared with leading international orchestras under eminent conductors.

His performance of Simon Boccanegra under the direction of Plácido Domingo for the Washington Opera Company at the Kennedy Center was his 100th role. Performances include the Concert for Racial Harmony in Washington, D.C., the Metropolitan Opera House in New York City, and the Los Angeles Opera. He was chosen to perform the "I Have a Dream" composition commissioned by the King family for the Martin Luther King Jr. celebrations in 2000.

Rising from humble beginnings in the small town of Centerville, Iowa, he is the grandson of a slave sold at auction for $500 and the son of a father who faithfully provided for his family with menial jobs from coal-mining to serving as a hotel porter.

With family values founded upon a godly heritage, character-building struggle and sacrifice, Simon Estes successfully faced each new hurdle and career challenge, culminating in triumph for this extraordinarily gifted performing artist.

When asked if he thought we were victims of fate or makers of our own destiny, he answered quickly "Makers of our own destiny."

Choosing to rise above mere celebrity status, Estes strives to be a positive role model for the next generation. His compassionate humanitarian efforts elevate him to hero status for the numerous youth who benefit from his vision for merit-based education and opportunity. He has been granted numerous honorary degrees including the Doctor of Humane Letters from Iowa State University in 1997.

Simon Estes makes it possible for young people around the world to pursue their dreams. He has helped talented students attend the Juilliard School of Music in New York City where he has been a professor since 1985.

In Oklahoma, he has established the Simon Estes Educational Foundation which has awarded over one million dollars in merit-based college scholarships.

The Simon Estes International Foundation for Children in Switzerland was established in 1993 and has saved lives by providing support for child health needs in Switzerland and Bulgaria.

During the 1998-99 school year, 40 musically gifted students from the Simon Estes School, serving some of the poorest children in South Africa, attended Des Moines-area high schools under the sponsorship of Rotary District 6000 and performed throughout Iowa as the Simon Estes South African Youth Chorus.

Carolyn Cutrona is a professor of psychology and director of the Institute for Social and Behavioral Research at Iowa State University. In July, she will become chair of the Department of Psychology.

Dr. Cutrona was born and raised in Ann Arbor, Mich., the daughter of an electrical engineering professor. She attended college at Stanford University, where she received a degree in English in 1973, while completing the science requirements for pre-medical training. Instead of attending medical school, she decided to study psychology. In 1974, she received a Master's Degree in counseling and guidance from the University of New Mexico, and in 1981, she received a Ph.D. in clinical psychology from UCLA. She completed a clinical internship at UCLA's Neuropsychiatric Institute, specializing in depressive disorders. Dr. Cutrona's first academic position was at the University of Iowa, where she was the first female faculty member in the Psychology Department to progress through all of the academic ranks, from assistant professor to professor. She received the University of Iowa's Faculty Scholar Award in 1989.

Dr. Cutrona moved to Iowa State in 1992. In 2008, she received the College of Liberal Arts Career Excellence Award for Research.

Dr. Cutrona's research has focused on stressful life events as predictors of the onset of depression and the extent to which supportive relationships with others can prevent depression. She wrote a book titled, Social Support in Couples; Marriage as a Resource in Times of Stress and has published numerous journal articles and book chapters on related topics. Dr. Cutrona has received more than $7 million in research funding from the National Institutes of Health, and she currently serves as principal investigator for the largest and longest-running study of African American parents (Family and Community Health Study). The study examines neighborhood, economic, occupational, family, and personal predictors of resilience and vulnerability to depression among more than 800 African American women and their families.

Dr. Cutrona served as associate editor for the Journal of Personality and Social Psychology and chaired the Psychosocial Development, Risk, and Prevention study section of the National Institutes of Health. She is a Fellow of the American Psychological Association and the American Psychological Society.

Dr. Cutrona has been an advocate for family-friendly policies to increase the number of women in academia. An active community volunteer, she has also worked in cities and small towns across the state of Iowa to increase the safety and quality of education for gay, lesbian, bisexual, and transgender youth in Iowa schools. In 2009, she received an “Outstanding Iowan” Certificate of Recognition from Governor Culver for her work with sexual minority youth.

Dr. Marguerite Pappaioanou is the executive Director of the Association of American Veterinary Medical Colleges (AAVMC), leading a dedicated and talented staff in supporting the mission, goals, and objectives of the Association, in collaboration with its partners.

She is an epidemiologist with over 25 years of experience in domestic and international public health. From February 2005 to October 2007, she served as a Professor of Infectious Disease Epidemiology in the Division of Epidemiology and Community Health in the School of Public Health at the University of Minnesota, holding a joint appointment with the College of Veterinary Medicine. Her research interests include emerging zoonotic diseases, particularly avian influenza, and in linking human and animal health sectors to address important human and animal health problems caused by zoonotic diseases.

This experience followed a 21-and-a-half year career at the U.S. Centers for Disease Control and Prevention (CDC), where she conducted applied research in malaria prevention and control in Africa, designed and led the implementation of the family of HIV seroprevalence surveillance programs, directed a capacity building project to strengthen skills of health officials in developing countries to use data for program and policy decision-making more effectively, led a research synthesis program supporting the development of the U.S. Guide to Community Preventive Services: Systematic Reviews and Evidence-Based Recommendations, and coordinated CDC's research and programs in Africa and Asia.

She is committed to promoting the linkages between veterinary medicine and other allied human and animal health professions.

She received her Doctor of Veterinary Medicine degree from Michigan State University in 1972, a Masters of Preventive Veterinary Medicine and Doctor of Philosophy degree from the University of California, Davis, in 1976 and 1982, respectively. She is a diplomate of the American College of Veterinary Preventive Medicine.

Clayton Anderson is an astronaut with the National Aeronautics and Space Administration (NASA). He is the first Iowa State University graduate to travel in space.

Anderson was born in Omaha, Neb., and grew up on Ashland, Neb. He received the B.S. degree (Cum Laude) in physics from Hastings College, Neb., in 1981 and M.S. in aerospace engineering from Iowa State University in 1983.

He joined the Johnson Space Center in 1983 in the Mission Planning and Analysis Division where he performed rendezvous and proximity operations trajectory designs for early Space Shuttle and Space Station missions. Before being selected as a mission specialist in 1998, he served as a flight design manager leading the trajectory design team for the Galileo planetary mission while serving as the backup for the Magellan planetary mission, supervisor and branch chief with the Flight Design and Dynamics Division, and manager of the Emergency Operations Center.

Following mission specialist training and prior to being assigned to a space flight, Anderson served in several mission support capacities, including: lead for the Enhanced Caution and Warning System development effort within the Space Shuttle Cockpit Avionics Upgrade Project, crew support astronaut for International Space Station (ISS) Expedition 4, and ISS Capsule Communicator (CAPCOM).

In 2007, Anderson spent a five month tour of duty working aboard the International Space Station. He launched to the Station on June 8, aboard Shuttle Atlantis with the crew of STS-117, and upon docking, he assumed the positions of Expedition 15 Flight Engineer and Science Officer for the expedition. During his 152-day tour of duty aboard the ISS, Anderson performed 3 spacewalks totaling just over 18 hours, and performed several tasks. Anderson returned home aboard Shuttle Discovery as a member of the STS-120 crew, landing at the Kennedy Space Center on Nov. 7, 2007. He is assigned to the crew of STS-131, targeted for launch in February 2010.

Among Anderson’s many awards and recognitions are the NASA Quality and Safety Achievement Recognition Award, an Honorary Doctorate Degree from Hastings College, and the distinguished Alumni Award from Iowa State University. He was also VEISHEA Parade Grand Marshal in 2008.

He is married to the former Susan Jane Harreld of Elkhart, Ind., and they have two children, Clayton “Cole” and Sutton Marie. Recreational interests include: officiating college and high school basketball, participation in all sports, coaching youth sports, flying, reading, writing music, playing the piano and organ and vocal performance. As an undergraduate at Hastings College, he competed on the football, basketball and track teams.
J. Dwayne McAninch was born and raised on a farm near Norwalk, Iowa. In the spring of 1954, while still in high school, he began his own earth-moving business at age 17 by purchasing a used crawler tractor from his father to dig farm ponds. By the end of the summer, he had graduated from Norwalk High School, paid off the tractor and started taking on earth-moving and pond construction jobs in the Des Moines area. That was the beginning of a pioneering career in the industry.

In 1967, he established the McAninch Corporation, and he has built the company into one of the most advanced and successful earth-moving and underground utility contracting companies in the nation, following a philosophy of continuous improvement combined with an ongoing search for new technologies and more effective methods of equipment utilization.

With his many years of experience using CAT equipment, Mr. McAninch has developed a strong relationship with Caterpillar, Inc., and from that experience has offered many suggestions for product revisions and development. He served in an advisory capacity for the board of Caterpillar/Trimble Control Technologies, LLC, until 2008.

Using knowledge he gained working with global positioning system (GPS) technology from practical experience in field applications, he provided extensive insight into adapting GPS technology for Caterpillar equipment. His work also led to the development of new construction methods using GPS, geotechnical engineering and computer-aided systems technologies that are now standard in the industry and that have reduced site preparation time and cost by nearly a third. He continues to push the engineering envelope, working to infuse a totally digital design and construction environment requiring little or no paper-drawn plans. For these and other achievements, he was named Engineer of the Year in 2005 by Engineering News-Record, the leading journal in the construction field.

Mr. McAninch is a strong supporter of the Civil, Construction and Environmental Engineering programs at Iowa State University with his time and resources. He played a lead role in helping the department establish the nation’s first hybrid ge-construction engineering initiative, and provided a leadership gift to enable the department to acquire a one-of-a-kind mobile soils testing laboratory.

As a civic-minded citizen of the greater Des Moines community, Mr. McAninch also supports new growth and development in the area. He has received numerous awards for his active role in fund raising for both community affairs and political leaders.

Mr. McAninch and his wife Glennis were married in 1960, and they have two children.
Chan Koo Park is chairman and CEO of chemical operations for Kumho Asiana Group, which consists of 25 individual companies and is one of the largest corporations based in the Republic of Korea. He has been a leader and innovator in the petrochemical industry for more than three decades.

After graduating from Iowa State with a bachelor of science degree in statistics, Mr. Park joined Kumho Industries in the late 1970s. He has served in top leadership positions with several of Kumho Asiana’s companies, and in 2006 became chairman and CEO of chemical operations. Mr. Park’s scientific and administrative leadership have played a major role in Kumho’s development into a world leader in the petrochemical industry.

Mr. Park introduced MDI (methylene diphenol diisocyanate) into Korean manufacturing in 1989, which led to Kumho being the first petrochemical company to patent advanced all-water-blown polyurethane technology for manufacturing. He also led Kumho’s development of a new ultra high cis polybutadiene that has revolutionized the manufacture of high-impact polystyrene, which is the principal component of tires, footwear, conveyors, sporting equipment and several other products. One of Kumho’s international partners in this work is Taylor Made.

As president of Kumho’s Vision Management Division in the 1990s, Mr. Park guided the company’s strategic decision to aggressively expand its synthetic rubber production, which accurately predicted a rapid rise in world demand for automobiles and tires, and which resulted in Kumho Petrochemical becoming the world’s second-largest producer of synthetic rubber and Kumho Tire becoming the world’s ninth-largest tire producer. Today, Kumho Petrochemical continues its leadership in synthetic rubber, and is the world’s largest producer of a promising new nano-chemical rubber antioxidant. He also led the establishment of the Asiana Airline, Kumho Express and Kumho Telecom divisons, and market expansions in China and Vietnam.

Mr. Park also has been a strong advocate and corporate leader in ensuring that Kumho’s technological advancements and product development are as environmentally friendly as possible. Among the efforts he has led are: development of a new rubber product that increases safety and fuel efficiency in automotive tires; commercialization of environmentally-friendly oil for rubber production; recycling of thermoplastic rubber products; and the development of a higher efficiency bituminous coal boiler.

Mr. Park has received numerous awards, including the Gold Tower Industry Honor, Korea’s highest corporate CEO award, Korea’s Environment-Friendly Award, and several awards from the Office of the Korean President for contributions to the national economy, industry safety standards, labor relations, the environment and social responsibility.

Mr. Park is married to Jin Young Wi, and they have two grown children, Jun Kyung Park and Joo Hyung Park.

The mission of the Senior Class Council (SCC), a committee of the Student Alumni Leadership Council (SALC), is to benefit and unite seniors through events and services while promoting an understanding of the Iowa State University Alumni Association. The 2009 Senior Class Council is comprised of 10 students who are dedicated to recognizing seniors for their many achievements.

This year’s Senior Class Council has planned a number of programs for seniors including both Fall and Spring Senior Weeks, where seniors enjoyed special tours and free food on campus; the Senior Package, a gift set that included a senior shirt and a commemorative Iowa State glass; and the Senior Sendoff, a brand new event for seniors at the new Alumni Center to celebrate seniors’ transitions to being alumni! The events that SCC plans and co-sponsors are intended to be both beneficial and enjoyable for seniors.

Each year, the graduating class selects a gift to donate to the University. This year the Class of 2009 elected to support the renovation CyRide bus shelters on campus, and add additional shelters at heavily-trafficked bus stops.

Finally, Senior Class Council invites you and your families to the Iowa State Alumni Center immediately following this commencement ceremony. Enjoy cake and refreshments and a chance to see your new Alumni Center. Plus, have a chance to personally meet Clayton Anderson. We hope you can join us!

For more information on SCC and SALC programs, please visit www.isusalc.org. To learn more about the Iowa State University Alumni Association, go to www.isualum.org.

James C. Wilson (1900-1995) was a member of Iowa State's English faculty from 1928 to 1931. He had to resign due to his lack of a Ph.D., and prior to his departure, he submitted a college song candidate for a song contest sponsored by the Iowa State Club of Chicago. Jim and his wife, Alice, moved to Chicago where, as he notes, “We (in addition to their two babies) had $212 in cash from my last paycheck, our five-year-old Chevrolet, and the tent.” He won first place with “The Bells of Iowa State,” and the family was able to purchase a small cottage on Lake Michigan.

“When I wrote ‘The Bells of Iowa State,’ I thought then that it had much more depth and emotion than your basic football fight song,” Wilson said. “Its continuing popularity leaves me very pleased, not so much because it’s my own song, but because it has had such a good effect on those who have been touched by it.” (The Iowa Stater, June 1983)
