Dear Iowa State University Graduates and Guests:

Welcome to Iowa State University’s Spring 2011 Commencement!

We congratulate all of the graduates and thank everyone who played a role in their successful journey through Iowa State. We have very much enjoyed your being a part of our university and community, and we wish you well as you embark on this next part of your life. We look forward to continuing our association with you as alumni of Iowa State, and we hope you will come back to visit the university often.

Iowa State University is now in its 154th year as one of the nation’s leading land-grant universities. We are very proud of the role this university has played in preparing the future leaders of our state, nation and world, and in meeting the needs of our society through excellence in education, research and outreach. As you graduate today, you are now a part of this great tradition and we look forward to the many contributions you will make.

I hope you enjoy today’s commencement ceremony, and that you will continue to be connected with Iowa State University.

Sincerely,

Gregory L. Geoffroy
President of the University

The Official University Mace

The Iowa State University mace symbolizes the authority of the university president. The lead faculty marshal carries it at the head of the academic procession and, by placing it on its stand, signals the beginning of the commencement ceremony.

In medieval times, the mace was a studded, clublike weapon, made of iron. It was capable of breaking armor, and was associated with the protection of kings in France and England.

In the 13th century, it was used for civil purposes and processions. Eventually it became a symbol for academic institutions, an emblem of order and authority in the pageantry.

Created in bronze, silver and tiger maple, the Iowa State University mace incorporates important campus icons such as the campanile located on central campus and the Fountain of Four Seasons, located on the north side of the Memorial Union and features likenesses of four Native American women. The sculptures were created in 1941 by Christian Petersen, sculptor-in-residence from 1934-1955.

The mace’s bronze headpiece is an interpretation of the campanile. It includes a silver presidential seal and reflects in a disc representative of the Fountain of the Four Seasons. The words “Iowa State University – Science With Practice” are inscribed on the edge of the disc. Under the disc is a shortened version or reflection of the campanile headpiece.

The tiger maple staff bears 14 bronze plaques inscribed with the names of all previous Iowa State presidents, their years of service, and a laurel leaf symbolizing the attainment of graduation.

At the staff’s base is an unfolding bronze leaf symbolizing the beginning of a new era for graduating students. The overall height of the University mace is 60 inches, and it weighs 14 pounds.

Sculptor Jeanne L. Stevens-Sollman of Bellefonte, Pennsylvania designed and crafted the Iowa State University mace.

Private funds from the ISU Alumni Association’s Circle of Former Presidents, Chairs, and Executive Directors, the Stanton Carillon Foundation, and the University Museums made the design and purchase of the Iowa State University mace possible.

The Presidential Chain of Office

The presidential chain of office symbolizes the rich history and traditions of Iowa State University and is worn by the president at all commencement ceremonies.

It was first worn by President Gregory Geoffroy during the Spring 2008 commencement ceremonies to mark the end of Iowa State University’s year-long sesquicentennial celebration.

Created by sculptor Jeanne Stevens-Sollman—the same artist who created Iowa State’s mace—the presidential chain of office complements the mace. The two pieces were commissioned by University Museums and the ISU Alumni Association and are part of University Museums’ Art on Campus collection.

The front of the presidential chain of office features an image of the campanile, and Beardshear Hall’s east portico (the campus home of the president) is on the back. The shoulder epaulets are the columns of Beardshear and contain the words Leadership and Service. The campanile links in the presidential chain of office contain the words Engagement, Learning, Discovery and Access. The reverse sides of the bronze sections have low bas reliefs of corn. Most pieces in the necklace are bronze. The seal in the center of the campanile and the links in the necklace are sterling silver.

Both the presidential chain of office and the mace are housed in the alumni center and are used at each commencement ceremony.
In May 2008, as part of its sesquicentennial celebration, Iowa State University debuted custom-designed doctorate regalia.

The special commencement doctorate gowns were created with emblems and colors to reflect Iowa State's tradition and to complement Iowa State's hood. The fabric is cardinal red gabardine with black velvet panels and chevrons edged with gold cording. The Campanile, a beloved symbol and University tradition, adorns each of the two front velvet panels. An eight-sided black velvet tam with a gold silk tassel completes the official regalia.

The ceremony as well as the academic costume at commencement symbolize the record of academic achievement of the various individuals taking part in commencement exercises. The use of academic costume reaches back to medieval times and the beginnings of the famed old universities of Europe and England. Gowns (long, full robes) and cloaks with hoods were common garb. The unheated buildings frequented by medieval scholars certainly were an important factor in the choice of clothing.

A confusing array of caps, gowns, and hoods emerged from the centuries in Great Britain and from early years of higher education in the United States. American institutions recognized the need for a standard code and the great majority of academic costumes now worn in the United States are in accordance with the general provisions of the Intercollegiate Code of 1895. This code was slightly revised in 1932 and again in 1959. Under this code, the bachelor's gown has pointed sleeves; the master's gown has oblong sleeves with an arc at the bottom; and the doctor's gown has bell-shaped sleeves.

The Code dictates that bachelor's and master's gowns are untrimmed. However, the doctor's gown is faced down the front with velvet and has three bars of velvet across the sleeves. The facing and bars may be black or may be a color pertaining to the discipline. The color of the commencement gown varies in other countries. In America, black is typically the color of choice for bachelor's and master's degrees.

The square shape of the scholar's cap or mortarboard is thought to denote the stability of scholars and their books as suggested in the old poem, "The Ballad of the Cap," first published in 1564. Candidates for advanced degrees wear black tassels. The following is a list of tassel colors for baccalaureate degree candidates:

- Agriculture and Life Sciences – Maize
- Business – Drab
- Design – Brown
- Engineering – Orange
- Human Sciences – Maroon
- Liberal Arts and Sciences
  - Bachelor of Arts – White
  - Bachelor of Liberal Studies – White
  - Bachelor of Music – Pink
  - Bachelor of Science – Golden Yellow
- Veterinary Medicine – Gray

The hood gives color to the academic costume while its length indicates the wearer's academic degree. At Iowa State, hoods are worn by doctorate degree recipients. Exceptions are made for honorary degree recipients and other officials of the ceremony. In general, hoods are made of a wide panel of black cloth, matching the gown and are lined with satin in the official academic colors of the institution awarding the degree.

Iowa State University's colors are cardinal and gold, therefore the top half of the lining is gold and the lower part is cardinal. The colors used in the edging of hoods and tassels are associated with the discipline. For example, dark blue represents Philosophy and all hoods used in conferring the Doctor of Philosophy degree at Iowa State University are of dark blue edging.
HOODING CEREMONY, DOCTOR OF PHILOSOPHY

The Doctor of Philosophy is the university's highest academic degree, awarded only to those who have successfully completed an intensive and demanding course of study whose primary focus is on learning to conduct original research.

The final stage of the program is the preparation and defense of a dissertation that describes the outcome of a major research project. To prepare for that project, the student must have gained expertise and skills in a particular discipline and must have thoroughly explored its existing knowledge base.

Those who receive doctorates have demonstrated that they are truly experts in their fields whose research has already contributed significantly to human knowledge.

The hooding ceremony symbolizes their admission to the exclusive ranks of those who have earned the respect associated with the title “Doctor of Philosophy.”

During the hooding ceremony, the degree recipients are escorted and hooded by their major professors who have worked with them throughout their study for the doctoral degree. The hoods will connect the graduate with a family of scholars throughout history and from all parts of the world.

SPECIAL RECOGNITION, ADVANCED DEGREES

Candidates for graduation for the Master's or Ph.D. may be recognized with the Teaching Excellence Award or the Research Excellence Award.

The Teaching Excellence Award recognizes those who provided outstanding contributions in teaching undergraduate students while working toward a graduate degree.

The Research Excellence Award recognizes those who with outstanding research accomplishments in a graduate program.

Honorees for both awards wear cardinal and gold honor cords and are noted in this program as follows:

§ Research Excellence Award
†† Teaching Excellence Award

SPECIAL RECOGNITION, UNDERGRADUATE DEGREES

Candidates for undergraduate degrees may be recognized for graduating “With Distinction” or for graduating in the Honors Program. Levels of special academic achievement are indicated in the commencement program by Latin phrases, also known as Latin honors. This system is recognized internationally, however the requirements vary among institutions. In the United States, Latin honors are most often awarded to those earning undergraduate degrees and each academic institution sets its own standards and requirements for each honor.

At Iowa State University, candidates for graduation with distinction must have completed 60 semester credits of coursework at ISU at the time they graduate, including a minimum of 50 graded credits. Those graduating summa cum laude (with highest distinction) have earned a grade-point average of 3.90 or higher; magna cum laude (with great distinction) have a grade-point average of 3.70 to 3.89; or cum laude (with distinction) have a grade-point average 3.50 to 3.69. Grade-point averages are based on a 4.0 scale. In addition to the notation in the commencement program, this recognition appears on the official transcript and diploma.

The University Honors Program is an individually planned program of study designed to provide greater depth and breadth of scholarship than the regular curriculum. Those graduating from the University Honors Program have a grade point average of at least 3.35 and have designed and completed an individualized program of study, including an independent Honors Research Project.

Students graduating with special recognition will wear cords and be noted in this program as follows:

* * * Summa Cum Laude - with highest distinction (cardinal and gold cords)
* * Magna Cum Laude - with great distinction (gold cords)
* Cum Laude - with distinction (cardinal cords)
† Honors Program (white cords)
**Academic Titles**

The following provides a brief description for the academic titles that appear in this program followed by a list of symbols for each title. Where appropriate, a symbol will be displayed behind the person's name.

Distinguished Professor denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

University Professor denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University.

An endowed chair or professorship provides special recognition to the faculty member to whom the title is awarded. It is held for a specific term, and during that time, endowment earnings are used by the university to supplement departmental support of the faculty member's scholarship and responsibilities in teaching, research, outreach, and service. These chairholders specialize in areas of study identified by the donors who created the endowments.

**Iowa State University Traditions**

*Information Provided by the Iowa State University Alumni Association*

The first swans on Lake LaVerne, Lancelot and Elaine, were a gift from the 1935 VEISHEA Central Committee. From that day on, there has been a pair of swans on Lake LaVerne.

When Iowa State’s young football team beat mighty Northwestern University 36 to 0 in 1895, and article in the *Chicago Tribune* said, “Northwestern might as well have tried to play football with an Iowa cyclone as with the Iowa team it met yesterday.” Thus, the “Cyclones” were born. Cy the Cardinal became Iowa State’s mascot in 1954.

VEISHEA, an all-university spring open house first organized in 1922, is among the nation’s largest university student-managed festivals. The festival got its name from the first letters of Iowa State’s first colleges: Veterinary Medicine, Engineering, Industrial Science, Home Economics, and Agriculture. Two of VEISHEAs long-standing traditions are individual cherry pies and the musical production “Stars Over VEISHEA.”

In 2003, Iowa State revived a 60-year-old tradition: the Official ISU Ring. Students and alumni worked with the ISU Alumni Association and University Book Store to design a ring that symbolically captures the uniqueness of Iowa State. Rings may only be worn by alumni or by students who have achieved junior or senior status. Rings are officially presented at an annual ring ceremony.

The tradition of “campaniling” states that a student officially becomes an Iowa Stater when he or she is kissed under the university’s campanile at the stroke of midnight.

It is said if you step on the bronze zodiac relief on the floor of the Memorial Union’s Gold Star Hall, you will flunk your next test.

The *Fountain of the Four Seasons* by artist-in-residence, Christian Petersen (Danish-American, 1885-1961), is located in front of the Memorial Union and was a gift from the 1937 VEISHEA Committee. In 1942, Christian Petersen added four sculptures to represent the four seasons. The east sculpture represents spring with the planting of corn; south - summer, sheltering a young plant; west - fall, holding the harvest; and north - winter, nursing a child. Legend has it that good luck will come to you if you throw a coin in the fountain.

Sharron S. Quisenberry joined Iowa State University as Vice President for Research and Economic Development in April 2009. She served five and a half years as Dean of the College of Agriculture and Life Sciences at Virginia Tech prior to coming to Iowa State. Dr. Quisenberry obtained her B.S.Ed. from Truman State University, M.A. in Environmental Biology from Hood College, and M.S. and Ph.D. in entomology from the University of Missouri-Columbia.

Dr. Quisenberry is recognized nationally and internationally for her work in host plant resistance to insects and insect-plant interactions. She co-authored a seminal book on conservation of germplasm for insect resistance that is used globally. She has published more than 100 articles, books and book chapters, with more than 150 other technical publications, and has obtained a patent and three registered germplasm/cultivars. She has presented more than 140 lectures at international, national and regional professional meetings. She has received funding for research as principal and co-principal investigator from NIH, NSF, USDA, Murdock Trust, Ford Foundation and industry.

In her current position, she leads Iowa State’s research and technology transfer enterprise in the attainment of the university’s goal of serving the people of the state and beyond by enhancing the vitality and sustainability of research scholarship, improving human and animal health and nutrition, and enhancing the quality of life and the environment.

Dr. Quisenberry is a member and past president of the Entomological Society of America and has served on several of its branch and national committees. She also holds the distinction of both Fellow and Honorary Member of the Society. She has served on the National Academy of Sciences’ Board on Agriculture and Natural Resources, the Board for International Food and Agriculture Development, and numerous other international, national, regional, and state boards and committees.

Dr. Mike Cates is the current director of the Master of Public Health program and the James B. Nichols Professor of Veterinary Public Health in the Department of Diagnostic Medicine and Pathobiology at the College of Veterinary Medicine at Kansas State University. Dr. Cates served for over 28 years in the United States Army Veterinary Corps, retiring in 2008 as a Brigadier General. From 2004 to 2008, he directed the Army’s Veterinary Corps and the Army’s main public health organization, the Center for Health Promotion and Preventive Medicine. He has served as the American Veterinary Medical Association’s representative to the One Health Commission and as an officer on the Commission’s Board of Directors from 2009-2011.

A native of Frisco Texas and a 1975 graduate of Frisco High School, Dr. Cates earned his DVM degree from Texas A&M University in 1980, his MPH from the University of Texas Health Science Center in Houston in 1987, and Diplomate status in the American College of Veterinary Preventive Medicine in 1989. He was named an outstanding alumnus of the Texas A&M University College of Veterinary Medicine in 2005 and a Distinguished Diplomate of the American College of Veterinary Preventive Medicine in 2008. Dr. Cates has long been an advocate of using the entire spectrum of expertise in human, animal and environmental health to find innovative ways to improve overall health. He now resides in Manhattan Kansas with his wife Linda and their 13 year old Norwich Terrier, Sugar Bear.

Harold Scheraga is one of the world’s leading physical chemists working on macromolecules, primarily proteins and nucleic acids. During a career spanning 60 years and using a unique combination of outstanding experimental and theoretical contributions, he has developed and applied physical methods to study interactions in model polypeptide systems and in proteins, and to study protein conformation and reactivity. He pioneered the development of the field of conformational energy calculations to determine structure and dynamics of proteins, work that has provided the basis for much current research in protein engineering and drug design.

Dr. Scheraga received his Bachelor’s degree from City College of New York in 1941 and A.M. and Ph.D. degrees from Duke University in 1942 and 1946, respectively. He joined Cornell University in 1947 as an instructor in chemistry and has spent his entire career there. He was promoted to full professor in 1958, was named Todd Professor in 1965, and became Todd Professor Emeritus in 1992. He also served as chair of the Chemistry Department from 1960 to 1967.

Dr. Scheraga has received many national and international honors and recognitions for his contributions to science. He is a member of the National Academy of Science and American Academy of Arts and Science, and he is a Fellow of the American Chemical Society, Biophysical Society, and American Association for the Advancement of Science. He is a six-time Fogarty Scholar of the National Institutes of Health. Four of his papers have been designated as “citation classics” by the journal Current Contents, and in the March 1982 issue, he was listed as the most frequently cited physical chemist in the world. In a 2009 ranking of the 2,000 most notable living chemists, he was ranked 11th. In addition, Dr. Scheraga has provided outstanding teaching and mentoring for many of today’s scientific leaders. He has supervised approximately 50 graduate students, and 300 post-doctoral associates and visiting scientists have carried out research in his laboratory.

Faculty members from Iowa State’s Department of Chemistry and Plant Sciences Institute nominated Dr. Scheraga for the honorary degree. Their nomination stated: “Dr. Scheraga has brought our understanding of protein structure in solution from the early concepts of colloid chemistry to the modern view in which we can now specify the internal inter-atomic interactions that determine how a protein folds to achieve its biologically active structure.”
Robert N. Shelton is the 19th president of the University of Arizona. He received the B.S. in physics from Stanford University, and M.S. and Ph.D. in physics from the University of California, San Diego, where he began his academic career as a research physicist.

Dr. Shelton joined the faculty at Iowa State University in 1978, and was promoted to professor in 1984. He also was affiliated with the Ames Laboratory of the U.S. Department of Energy at ISU. In 1987, he joined the faculty at the University of California, Davis, as professor and chair of the Department of Physics, was appointed Vice Chancellor for Research in 1990, and Vice Provost for Research of the University of California system in 1996. In 2001, he joined the University of North Carolina, Chapel Hill, as Executive Vice Chancellor and Provost, and in 2006 he was named President of the University of Arizona. He also holds the title of professor of physics at Arizona.

Dr. Shelton's research has focused on collective electron effects in novel materials, and he made many significant contributions to the advancement of superconductivity and superconductive materials. Before turning his full attention to academic administration in 2002, he amassed an impressive record of publications, with nearly 250 refereed articles in the leading scientific journals, and more than 5,400 citations. He was a guest scientist at the Kernforschungsanlage in Julich, Germany and the Institute of Metals in Tokyo, and was a visiting professor at the University of Geneva, Switzerland. In 1995 he was elected a Fellow of the American Physical Society.

Dr. Shelton has provided innovative and effective leadership for the University of Arizona. His “Transformation Plan” was launched to respond to the growing economic crisis affecting Arizona universities as well as other institutions across the nation. He also introduced “Arizona Assurance,” a program that allows Arizona high school graduates from families making less than $42,400 to attend the UA and graduate with little or no debt, with funding provided by private donors.

Dr. Shelton and his wife of more than 40 years, Adrian A. Shelton, were undergraduates at Stanford. They have three adult children: Christian Shelton, an associate professor of computer science at UC-Riverside; Cameron Shelton, an assistant professor of economics at Claremont McKenna College; and Stephanie Shelton Crossen, who is in a pediatric medicine residency at Oregon Health Sciences University.

Faculty members from Iowa State's Department of Physics and Astronomy nominated Dr. Shelton for the honorary degree. The nomination stated: “In addition to his international reputation as an outstanding physicist, Dr. Shelton is an accomplished national leader in higher education with an expansive vision of academic excellence. Furthermore, he has provided vital leadership on the national research agenda.”
Simon Estes, internationally-acclaimed bass baritone, is the star of the stage at the world’s major opera houses, a regular guest at international festivals, and has appeared with leading international orchestras under eminent conductors.

His performance of Simon Boccanegra under the direction of Placido Domingo for the Washington Opera Company at the Kennedy Center was his 100th role. Performances include the Concert for Racial Harmony in Washington, D.C., the Metropolitan Opera House in New York City, and the Los Angeles Opera. He was chosen to perform the "I Have a Dream" composition commissioned by the King family for the Martin Luther King Jr. celebrations in 2000.

Rising from humble beginnings in the small town of Centerville, Iowa, he is the grandson of a slave sold at auction for $500 and the son of a father who faithfully provided for his family with menial jobs from coal-mining to serving as a hotel porter.

With family values founded upon a godly heritage, character-building struggle and sacrifice, Simon Estes successfully faced each new hurdle and career challenge, culminating in triumph for this extraordinarily gifted performing artist.

When asked if he thought we were victims of fate or makers of our own destiny, he answered quickly "Makers of our own destiny."

Choosing to rise above mere celebrity status, Estes strives to be a positive role model for the next generation. His compassionate humanitarian efforts elevate him to hero status for the numerous youth who benefit from his vision for merit-based education and opportunity. He has been granted numerous honorary degrees including the Doctor of Humane Letters from Iowa State University in 1997.

Simon Estes makes it possible for young people around the world to pursue their dreams. He has helped talented students attend the Juilliard School of Music in New York City where he has been a professor since 1985.

In Oklahoma, he has established the Simon Estes Educational Foundation which has awarded over one million dollars in merit-based college scholarships.

The Simon Estes International Foundation for Children in Switzerland was established in 1993 and has saved lives by providing support for child health needs in Switzerland and Bulgaria.

During the 1998-99 school year, 40 musically gifted students from the Simon Estes School, serving some of the poorest children in South Africa, attended Des Moines-area high schools under the sponsorship of Rotary District 6000 and performed throughout Iowa as the Simon Estes South African Youth Chorus.
The Simon Estes Music High School provides a well rounded education to individuals in the communities of the Greater Cape Flats area. The school presents a full daily academic program that is in accordance with the Western Cape Educational Department and includes the formal teaching of Music, the Languages (English, Xhosa and Afrikaans), Mathematics, and the Sciences and the Humanities.

In 1997, Mr. Simon Estes established the Simon Estes Music High School in a house in Southfield, Cape Town. Later that year, the Simon Estes Music High School had doubled in numbers and the premises became inadequate and new premises had to be found. The school then moved to the current location that they are currently renting from the Roman Catholic Church.

The community increasingly wants to enroll their children at this school. In 2002, the school was forced to acquire three additional prefabricated classrooms, but even that has become inadequate in accommodating the influx of applicants. The result is that each year the school turns away enthusiastic and talented young learners.

The staff of the Simon Estes Music High School is committed to the all around education, psychological, musical and spiritual development of their students. It is the mission to serve the individual needs of all and hope they will become “HEROES” of our world. Simon Estes Music High School is dedicated to building long-term relationships with the community through quality education and community support, and wants to be recognized as the leading Music and Academic School in the Greater Cape Town area.

Monwabisi Mbambani, conductor
Mr. Monwabisi Mbambani is a music teacher, vocal coach and director of choral activities at the Simon Estes Music High School. Before joining the school in 2006, he performed with Cape Town Opera and University of Cape Town Opera School. In 2002, he debuted with the Cape Town Opera performing at the Artscape Opera House singing Donizetti’s Lucia di lammermoor, Verdi’s Aida, Nabucco, Il Trovatore, La Traviata, Bizet’s Pearl Fishers, and Leoncavallo’s Pagliacci.

Under his conducting, the Simon Estes Music High School Choir has won the Eisteddfod Competition Provincial, the National Championship and directed the choir in a tour around the country for the Safmarine 50th Anniversary. He has also conducted the Yale Alumni with Simon Estes and the Simon Estes Music Choir during the 10th Anniversary of the school, and conducted the choir in singing the National Anthem for the RSA and DRC Congo State Banquet honoring the Honorable President of DRC and the President of the RSA Mr. Thabo Mbeki.

The choir has also performed in the Welcoming of the Secretary of State, the Honorable Hillary Clinton, when she visited the African Countries in 2009. Mr. Mbambani also conducted the premiere performance of Save the Children with the Simon Estes Choir at the Coca Cola Dome in Johannesburg and in the Africa Celebrating Grand Finale for the FIFA Soccer World Cup in 2010.

An official list of summer 2011 graduates will appear in the fall 2011 commencement program.
The mission of the Senior Class Council (SCC), a committee of the Student Alumni Leadership Council (SALC), is to benefit and unite seniors through events and services while promoting an understanding of the Iowa State University Alumni Association. The 2010-2011 Senior Class Council is comprised of 11 students who are dedicated to recognizing seniors for their many achievements.

This year's Senior Class Council has planned a number of programs for seniors including both Fall and Spring Senior Weeks, where seniors enjoyed special tours and free food on campus; the Senior Package, a gift set that included commemorative Iowa State items; Grad Breakfast, a chance for seniors to relax and enjoy a meal served by ISU faculty and staff; and the Senior Send-off, a year-end event for seniors at the ISU Alumni Center to celebrate seniors' transitions to being alumni! The events that SCC plans and co-sponsors are intended to be both beneficial and enjoyable for seniors.

Each year, the graduating class also selects a gift to donate to the University. This year the Seniors have elected to renovate and expand the outdoor seating area surrounding the Hub.

Finally, Senior Class Council always invites you and your families to return to the Iowa State Alumni Center as you are all now Alumni of Iowa State University!

For more information on SCC and SALC programs, please visit www.isusalc.org. To learn more about the Iowa State University Alumni Association, go to www.isualum.org.
